

THE NUMBERS

Six figures behind the advice, without the hype.

66%

of adults with ~31 years of type 1 had a hand or shoulder condition — DCCT/EDIC, Diabetes Care 2014

31%

had frozen shoulder, about five times more likely with diabetes than without

~6x

faster insulin absorption when an injection site was massaged for 30 minutes — Linde 1986

+110%

insulin absorption after two sauna sessions; glucose 3.0–3.3 mmol/L lower — Koivisto 1980

~1 in 3

people with type 1 have lumps at insulin sites (lipohypertrophy) a therapist may spot first

0

professional orders for massage therapy or orthotherapy in Québec — titles aren't protected
