

TELL YOUR THERAPIST

Two minutes before you lie down does most of the safety work.

1 • Insulin

Pump or injections — last dose, when and where

2 • Devices

Sensor here, pump site here. No oil, pressure or stretching on them

3 • Glucose

The number right now, and whether it's steady, rising or falling

4 • The word

If I say “sugar”, stop — I may be going low

5 • Numb areas

Broad pressure, no heat — stones and hot towels can burn skin that can't feel

6 • Getting up

Let me sit on the edge of the table before I stand
