

I have type 1 diabetes

INSULIN

☐ pump ☐ injections · last dose at _____ in my _____

DEVICES

Sensor: _____ Pump site: _____

GLUCOSE NOW

_____ mmol/L ☐ steady ☐ rising ☐ falling

NUMB AREAS

ALSO

☐ stiff joints ☐ wounds ☐ dizzy when standing
☐ recent eye surgery

If I say “SUGAR”, stop — I may be going low.

Please

- No oil, pressure or stretching within a hand's width of my sensor or pump site.
- Skip my recent injection site and pump site — and no heat there (stones, packs, hot towels).
- Broad, gentle pressure and no heat on numb areas.
- Keep my fast sugar within my reach. Let me sit a moment before I stand.

Signs of a low: confusion, sweating, shaking, sudden quiet. Stop, help me sit up, sugar first. Unconscious or seizing: call 911, nothing by mouth.
